

Fire Technology & Safety Laboratory

The Laboratory conducts testing, analysis, research, and others for the technical improvement for safe community life and effective disaster scene activities.

In addition, the Laboratory determines fire causes, using advanced analyzing systems.

In case of extraordinary chemical disasters, Laboratory members also respond to the scene to analyze the residues there and give advice to the incident command post staff.

Fire Academy

As an educator, it offers the Recruit Training, the Officers' Courses, the Technical Courses, and so on. The Academy's program helps both fire department firefighters and volunteer firefighters cope with more complex disasters more effectively than before.

Maintenance Shop

The Shop conducts apparatus checking for the best firefighter activities with the motto, "We keep up maintenance for perfect disaster operations."

In case of the mechanical trouble at a disaster scene, Shop members join and support the on-site firefighters, conducting checking and repairs.
