

New National Athletic Stadium (under construction)

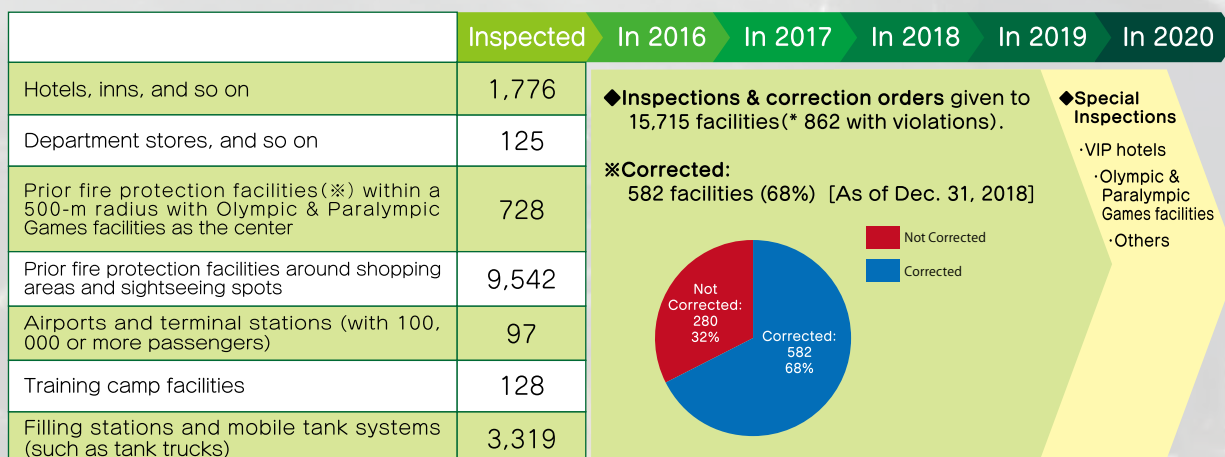

The TFD checks commercial buildings and hazmat facilities for fire hazards, gives fire protection management advice, conducts fire cause investigations/analyses, and others for greater safety.

Safety Measures For The Olympic And Paralympic Games Tokyo 2020

With the Games immediately ahead, the TFD gives advice on the fire safety and efficient evacuation in audience areas, the foreign language skills development for foreign visitors, and more.

In addition, the TFD checks Games facilities and hotels for Fire Service Law violations, and urges necessary corrections.

Inspections for the Olympic & Paralympic Games Tokyo 2020

※Those with fire protection managers and automatic fire detection systems (ex., airports, stations, museums, important cultural assets, and large public assembly places).

Safety Measures For The Toyosu Market

The TFD started to offer safety measures in the stage of the Market's designing, and checked facilities in their construction and completion stages before the Market's inauguration in October 2018.

For Market visitors' safety, the TFD calls for the appointment of fire protection managers and others, the preparation of fire protection plans, and fire/evacuation drill management skill development.

Fire drill at the Toyosu Market

Restaurant Fire Safety

Restaurant fire

A restaurant fire developed into a catastrophe in Itoigawa City. This incident led to the amendment of the Fire Service Law, and the placement of fire extinguishers was made mandatory for every restaurant. The TFD urges restaurants to have extinguishers, and gives kitchen fire prevention advice.

Tank truck checking

Restaurant kitchen inspection

Fire cause investigation

Announcement Of Fire Safety Violations

The TFD announces the names, the addresses and the grave law violations of those who have no fire protection equipment (*i.e.*, wall hydrants, sprinklers or automatic fire alarms) installed. Likewise, habitual offenders' details are also announced. Violator information is found on the TFD Internet and in fire stations as well.

Fire Safety Building Certificate (*Excellence Mark*)

Currently, 973 constructions including hotels, department stores and Tokyo 2020 Games facilities have the *Excellence Mark* as fire-safe buildings as of January 1, 2019.

The TFD Home Page shows both *Excellence Mark* buildings and law violation buildings.

The Tokyo International Airport Area Was Designated As A Special Petrochemical Complex Safety Control Area

The Tokyo International Airport (Haneda Airport) Area was designated as a special petrochemical complex safety control area in August 2018. This is because of the increase in the hazardous materials like airplane fuel that need to be stored and handled in the area.

With this designation, the TFD has been reinforcing its forces with additional fire apparatus and equipment, teaming up with the private sector, and promoting hands-on fire drills.
